

well, the first thing we did is that he made us make a html file and use article and explain the difference between article and section. He also told us to make something in html and show him only using html.

What I learned:

I've learned that you aren't supposed to use the `
` element in html and, I learned what the difference is between article and section also we learned that we are supposed to re size are photos in photoshop to get the best quality as well.

How it think it went:

I personally think it went well I knew most of the things that we did in html and of course more we get into it the more I will learn.

```

index.html > ...
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4      <meta charset="UTF-8">
5      <meta name="viewport" content="width=device-width, initial-scale=1.0">
6      <title>Document</title>
7      <link rel="stylesheet" href="./styles/style.css">
