

in the first week of the semester 2 I did some photography. I had to make two different portraits a professional and a creative one. For this assignment I used gimp to edit the image. I had to use gimp because at that time I did not buy the adobe cloud yet.

What I learned:

I have started to learn more about photoshop and illustrator. I have never used these tools before semester 2 so I had no practice with it. editing the picture on gimb at first give me a glimpse of how to edit picture then when I started to use photoshop I realise that there are so many more thing you can do and so many more different tools in photoshop.

How I think it went:

Well using gimb was a bit different than normal editing in phones but I think it went well.
