

For this assignment I did some stylescapes to show case our client some colour pallet and show them the typography for their brand. For stylescapes I used Figma.

What I learned:

I learned what stylescapes are use for and made a few to show our client which one she would like the most.

How I think it went:

Well at first I did t really understand why it was use for but after some explanation and workshop that we had really showed me why you should use stylescapes.
